## Derailleurs

- 1 Shimano FH-RM66
- 3 Shimano Nexus SG-3D55
- 7 Shimano Nexus SG-C3001-7D
- 8 Shimano Nexus SG-C6000-8D

# Technology

## 18-inch wheels

Thanks to its large 18-inch wheels you can easily and comfortably ride your Sharvan bike over longer distances.

## Front wheel mounting

The front wheel of the Sharvan bike is mounted on a single armed fork that is both sturdy and quite practical when folding the bike.

## Drive belt

The belt transfers the energy from the pedals to the wheel much more efficiently than a chain, its lifespan is much longer and it also does not require any maintenance or lubrication.

## Disc brakes

High quality disc brakes from Shimano are standard on every Sharvan bike model. You can rely on them even at high speeds. They let you stop the bike safely and effectively in any situation.

## Flexible and flexible frame

The polyamide-carbon frame absorbs shocks from various surfaces which you will especially appreciate in the city. Even after years of use, it does not lose its properties and guarantees the safety of the bicycle. This frame was awarded as „Innovative Act of the Year“.
